

The State of the Union

Roma: Racism, economic crisis and development

The Roma population is the first ethnic minority in the European Union, representing the poorest and most neglected social sector and is the victim of political persecution of racial apartheid, violence, prejudice, xenophobia, anti-deportation. In 1930 a severe economic and financial crisis affecting the world and Europe. Racism in Europe becomes political system and state over the years 1920-40. Nazism in Germany and Fascism in Italy based on the state anti-human and anti-historical principles: for these schemes, mankind is divided into races. Start the most important attempt at annihilation of mankind. In the camps, death camps are detained, tortured and done away with millions of human beings: the Roma population with the Jewish people, homosexuals, the disabled, the poor, the homeless, the marginalized is among the main victims. The political system of racism and war has destroyed part of the world, caused 60 million deaths, trying to remove it from the earth to the existence, history and culture of some of the most ancient peoples of the earth: the Roma people and the Jewish people.

The ethnic extermination of the Roma population is not on trial in Nuremberg, the Roma population to which they were removed from all economic goods is not allowed even as a civil party. A criminal trial is not a crime unpunished, and an unpunished crime is a crime that continues every day. The Roma Holocaust, the Porrajmos has continued until today.

In recent years the European Parliament, the European Commission and the Council of Europe have put the "Roma issue" in the center of his thinking and interests. Continue to exclude, harass and humiliate the first ethnic minority represented by the European Union 12 million people is a factor of economic and human crisis. The economy is produced by humans and an economy that excludes millions of human beings is an economy that produces crises, war and destruction, racism and its economic and political expression, Nazism and Fascism have produced only barbarism.

The appeals to the Governments of the Member States by leading European authorities on the recognition of Porrajmos, the first ethnic minority in the EU have remained unheard until now. The State in Italy was the protagonist of racial persecution against the Roma population. The economic crisis of recent years has brought an important part of Italian politics and parties have to retake ideas and racist laws. In 2008 the government of former Prime Minister Silvio Berlusconi and former Interior Minister Roberto Maroni approves a new law against racial Roma: "Roma emergency is the decree."

For the Roma population still exclusions, persecutions. Actual deportations are activated in Italy and France. Nicolas Sarkozy is set Sept. 4, 2010 as a Nazi by the Vice President of the European Commission Viviane Reding for "assisted repatriation" made against the Roma minority. Former Interior Minister Roberto Maroni expressed solidarity with the French President Sarkozy. Once again you continue to practice racism and to destroy the economy. The Roma population is listed as the head of the crisis, is used as a scapegoat for poor and marginalized minority to deceive the entire population of states and political and electoral gain compliance.

European civil society, the Roma people, the leaders of the European institutions join together to reject racism and the destruction of the economy. Silvio Berlusconi was forced to resign, Nicolas Sarkozy defeated in the election campaign. In a recent World Bank study published by the European Commission is estimated at 165 million euros on average tax benefit for each State of the Union since the inclusion of the Roma population. The European Central Bank, reports the European Commission during the Summit of Mayors Strasbourg on 22 September 2011, dedicated to the Roma issue, is ready to invest 84 billion euros from 2012 to 2020.

Building a cohesive and united Europe, tackling the economic crisis significa confront and defeat the politics of destruction and annihilation of mankind: racism is a cancer that kills. The Roma population is willing to help the Europe Union to tackle the crisis, overcome racism and to say an economy that puts focus on children, women and men. No one should be excluded. Every human being who died in the seas for ristingimenti, every human being excluded, marginalized and affected by racism has a wound to the European economy and world. The racist policy uneconomic, anti-historical and anti-human must end to start an economy of human progress, cultural, economic and financial.

The Italian government, the Prime Minister Mario Monti has to listen to the suggestions of economic experts from the World Bank and European Central Bank on the issue of Roma. The Prime Minister Mario Monti has withdrawn the appeal filed February 15, 2012 the Supreme Court of Cassation in which the government opposes the judgment of 16 November 2011 by the State Council. The State Council has abolished a law declaring illegal the decree racist "Roma emergency" of the Berlusconi government. Qualla law has transformed the "Roma issue" in a public order problem. That law gave opportunity to the Prefects and Mayors to continue the persecution of the Roma population. The mayors who want to get into Europe by the rules, the economy, humanity, the European Directives 2004/38/EC and 2000 / 43/CE

The Roma people can teach the rest of the European peoples the path of peace, the unity of family, culture, music, arts and humanity. Just listen and have a willingness to learn.
